

CONTENTS

PREFACE

1 INTRODUCTION

- 1.1 Structure of this manual

2 DATA MANAGEMENT

- 2.1 File Organization
 - 2.1.1 Files
 - 2.1.2 Data records
- 2.2 Record Identification
 - 2.2.1 Index File
 - 2.2.2 Prime key
 - 2.2.3 Duplicate Keys
 - 2.2.4 Currency
- 2.3 Record Access
 - 2.3.1 Access Method
 - 2.3.2 Examples
- 2.4 Blocking
 - 2.4.1 Blocking Factor
 - 2.4.2 Examples
- 2.5 Data Management Functions
 - 2.5.1 File Handling Functions
 - 2.5.2 Sharability
 - 2.5.3 Data Set Declaration
- 2.6 File Enlargement
 - 2.6.1 Growth Factor
 - 2.6.2 Example
- 2.7 Transaction Control
 - 2.7.1 Integrity Unit
 - 2.7.2 Transaction Control Functions

3 VOLUME ORGANIZATION

- 3.1 Disk Types
 - 3.1.1 Disk Volumes
 - 3.1.2 CMOS Memory
 - 3.1.3 Simulated Disk in Primary Memory
- 3.2 Disk Structure
 - 3.2.1 Sectors
 - 3.2.2 Interlacing
 - 3.2.3 PTS6875 and PTS6876 Disk Versions
- 3.3 Survey of Disk Capacity
- 3.4 Reserved Areas
 - 3.4.1 Volume Label
 - 3.4.2 Free Space Administration Table
 - 3.4.3 VTOC Records
- 3.5 Volume Creation
 - 3.5.1 Badspot File (B-file)
- 3.6 Reserved File Names
 - 3.6.1 Standard Data Management Files
 - 3.6.2 Extended Data Management Files
 - 3.6.3 System File Names

- 4 TOSS DATA MANAGEMENT PACKAGES
 - 4.1 Extended Data Management
 - 4.1.1 Versions of EDM
 - 4.2 Standard Data Management
 - 4.3 Abridged Data Management
 - 4.4 Comparison
 - 4.5 Summary

- 5 FILE PARAMETERS
 - 5.1 Introduction
 - 5.2 Data File Parameters
 - 5.3 L and X File Parameters (only ADM)
 - 5.4 Index File Parameters
 - 5.5 Layout of the File Parameter Block

- 6 DISK FILE HANDLING INSTRUCTIONS
 - 6.1 Introduction
 - 6.1.1 Survey of Disk File Handling Instructions
 - 6.2 Open File
 - 6.3 Close File
 - 6.4 Set Current Record Number (not for ADM)
 - 6.5 Read File Parameters
 - 6.6 Read Record
 - 6.7 Write Record
 - 6.8 Rewrite Record
 - 6.9 Discard Record
 - 6.10 Commit
 - 6.11 Rollback (only for EDM)
 - 6.11.1 Automatic Rollback

- 7 ABRIDGED DATA MANAGEMENT
 - 7.1 Introduction
 - 7.2 ADM Instruction Set
 - 7.3 File Types
 - 7.4 File Creation
 - 7.4.1 File Creation under ADM
 - 7.4.2 File Creation by TOSS Utilities
 - 7.4.3 Enlarging Files
 - 7.4.4 Buffer Management
 - 7.5 L and X File Handling
 - 7.6 Return Information
 - 7.6.1 Status Word
 - 7.6.2 Return Status

8 STANDARD DATA MANAGEMENT

- 8.1 Introduction
- 8.2 SDM Instruction Set
- 8.3 File Types
 - 8.3.1 Standard Files
 - 8.3.2 Indexed File of S-type
 - 8.3.3 Index File of S-type
 - 8.3.4 Master Index File
 - 8.3.5 File Structure
- 8.4 Record Identification
 - 8.4.1 Record Keys
 - 8.4.2 Currency
 - 8.4.3 Last Record Number (LRN)
- 8.5 File Creation
 - 8.5.1 Creating a File by SDM
 - 8.5.2 Creating Files by the TOSS Utilities
 - 8.5.3 Master Index File Size
 - 8.5.4 Load Factor
- 8.6 Enlarging Files in SDM
- 8.7 File Maintenance
- 8.8 File Recovery
- 8.9 Buffer Management
 - 8.9.1 Block Buffers
 - 8.9.2 Delay Option
- 8.10 Return Information
 - 8.10.1 Status Word
 - 8.10.2 Return Status

9 EXTENDED DATA MANAGEMENT

- 9.1 Introduction
- 9.2 Instruction Set
- 9.3 File Types
 - 9.3.1 Standard Files
 - 9.3.2 Indexed Files of E-type
 - 9.3.3 Free Record Chain
 - 9.3.4 File Status
- 9.4 Record Identification
 - 9.4.1 Prime Key
 - 9.4.2 Concatenated Keys
 - 9.4.3 Duplicate Keys
 - 9.4.4 Conditional Indexing
 - 9.4.5 Currency
- 9.5 Logging
 - 9.5.1 File Recovery
 - 9.5.2 Transaction Logging
 - 9.5.3 Transaction Log Information
 - 9.5.4 Transaction Log Buffers
 - 9.5.5 Transaction Log File
 - 9.5.6 Initializing the Transaction Log File
 - 9.5.7 Function Logging
 - 9.5.8 Function Log Information
 - 9.5.9 Function Log Buffers
 - 9.5.10 Function Log File
 - 9.5.11 Initializing the Function Log File
 - 9.5.12 Function Log File on Disk

- 9.5.13 Automatic Enlargement of Function Log File
- 9.5.14 Function Log File full (Disk)
- 9.5.15 Function Log File on Tape
- 9.5.16 Function Log File full (Tape)
- 9.6 File Creation
 - 9.6.1 Creating an E-File with Utility CRF
 - 9.6.2 Creating an E-File by EDM
- 9.7 Enlarging Files
- 9.8 File Maintenance
- 9.9 Return Information

10 RETURN INFORMATION

- 10.1 Introduction
- 10.2 Condition Register
 - 10.2.1 Condition Register
 - 10.2.2 Condition Register and Status Word
- 10.3 Status Word
- 10.4 Return Status
- 10.5 Supplementary Return Status (EDM only)

Appendix A SPACE REQUIREMENTS

- A.1 Introduction
- A.2 Extended Data Management
 - A.2.1 Size of Object Code
 - A.2.2 Size of Data Areas
- A.3 Standard Data Management
 - A.3.1 Size of Object Code
 - A.3.2 Size of Data Areas
- A.4 Abridged Data Management
 - A.4.1 Size of Object Code
 - A.4.2 Size of Data Area
- A.5 File Management
 - A.5.1 Size of Object Code
 - A.5.2 Size of Data Areas
